

THE DURHAM BRT VISION

In recent planning efforts, the public (you!) said they wanted quick and reliable regional transportation connections. The Durham Bus Rapid Transit (BRT) Vision will plan for long-term investments needed to make that goal a reality.

The Durham BRT Vision Plan is being developed in coordination with the Central Durham BRT Project, a 5-mile corridor already identified for BRT improvements running from the Duke VA Medical Center to Downtown Durham to the Village. The Durham BRT Vision Plan will identify additional corridors for BRT investment over the next 30 years.

To learn more about the Central Durham BRT project visit: <https://www.durhamnc.gov/5395/Central-Durham-Bus-Rapid-Transit-Project>

WHAT IS BRT?

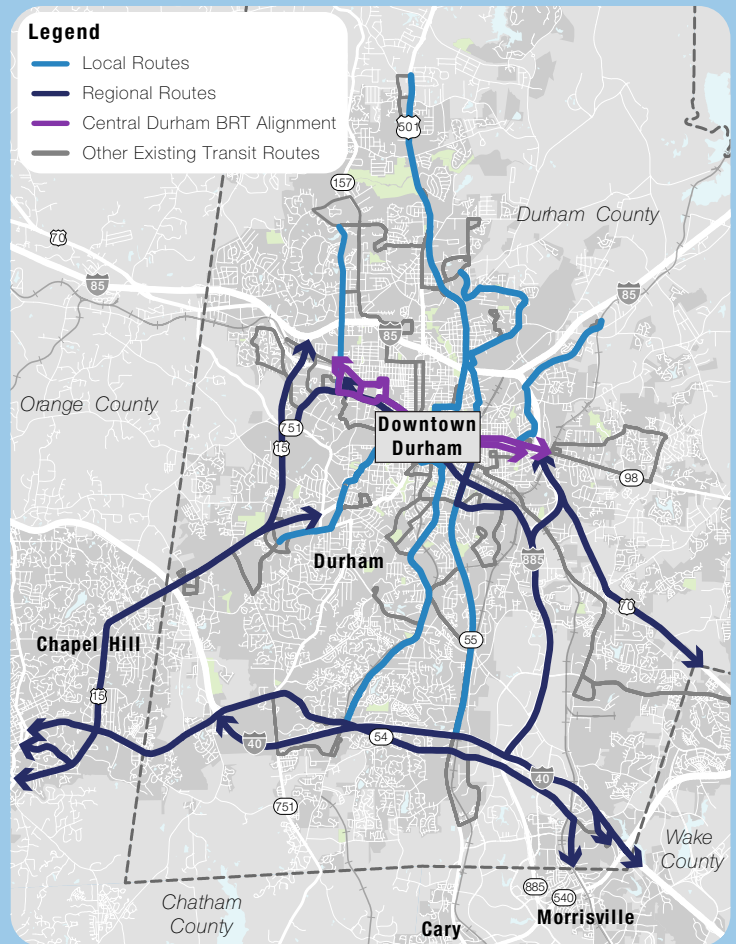

Bus Rapid Transit (BRT) is a high-quality, bus-based transit service that is safe, reliable, and frequent. BRT typically includes:

- High Frequency Service with Fewer Stops
- Enhanced Vehicle and Station Passenger Amenities
- Traffic Prioritization Technology
- Some amount of dedicated bus lanes

Example of BRT

UNIVERSE OF CORRIDORS

The corridors above are being studied for potential BRT. The final plan will identify six corridors for the implementation of BRT over the next 30 years.
