

THE DURHAM BRT VISION

In recent planning efforts, the public (you!) said they wanted quick and reliable regional transportation connections and better local bus service. The Durham Bus Rapid Transit (BRT) Vision Plan will plan for long-term investments needed to make that goal a reality.

The Durham BRT Vision Plan is being developed in coordination with the Central Durham BRT Project, a 5-mile corridor already identified for BRT improvements running from the Duke VA Medical Center to Downtown Durham to the Village. The Durham BRT Vision Plan will identify additional corridors for BRT investment over the next 30 years.

To learn more about the Central Durham BRT project visit: <https://tinyurl.com/CentralDurhamBRT>

WHAT IS BRT?

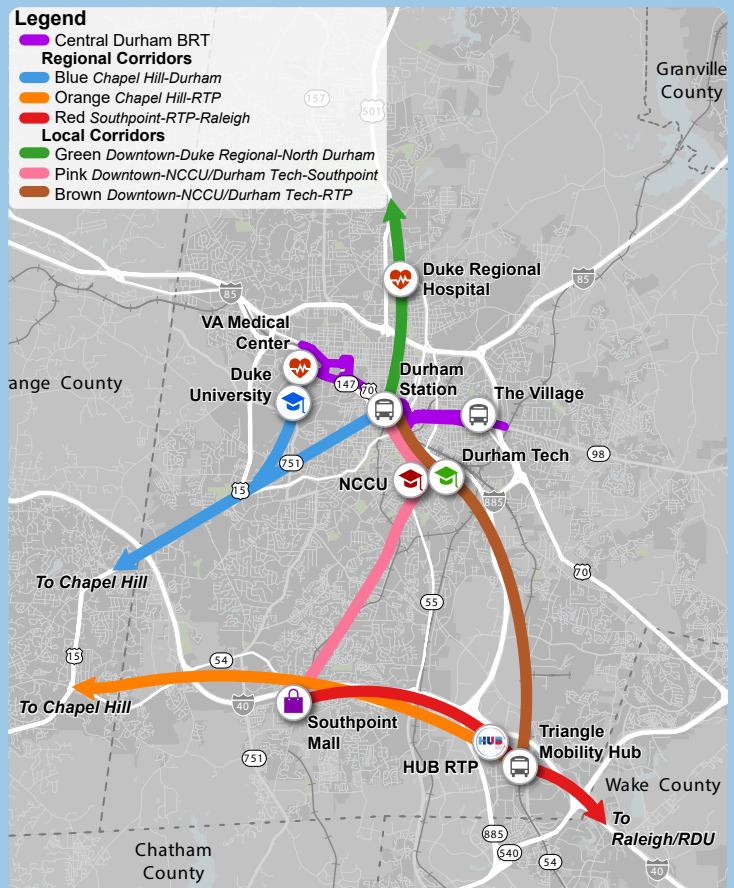

Bus Rapid Transit (BRT) is a high-quality, bus-based transit service that is safe, reliable, and frequent. BRT typically includes:

- Shorter Wait Times
- Fewer Stops
- Better Bus Stops
- Bus Priority at Signals
- Dedicated Bus Lanes

Example of BRT Improvement

HIGH POTENTIAL BRT CORRIDORS

A data-driven analysis combined with community input identified the above corridors for high-capacity transit investments in Durham and the surrounding region. However, not every improvement can be made at once. We need your input to prioritize transit investments for the future!
